Line-up

1x Drums, 1x Keyboards, 2x Vocals, 1x Guitar, 1x Bass

Equipment

Drums (Phil): Tama Swing Star with 2x Kick, 2x Snare, 7 Toms (4 Rack, 3 Stand), 2 x Crash, 2 x China, 1x Ride, 2x Hi-Hat, 19" support case left-handed

Bass (Mark): TBD

Guitar (Woody): TBD

Keys (Enno): Keyboard stand with Yamaha AN1x and CME UF60, 19" support case right-handed

Vocals (Sali): Shure GLXD24/SM58

All of the equipment uses 230 VAC power. If necessary, appropriate adapters must be provided by the host in sufficient number.

Monitoring

Mooncry uses own (wireless) in-ear monitoring for all band members. The necessary channels are directed to the band's monitoring rack via line splitter. The mix is maintained by the band itself. If possible, one wedge placed on stage front middle for the singer.

Stage

At least 35 m² (7m x 5m) of accessible stage, with rainproof canopy and solid staircase. If possible, 6m² (2m x 3m) Drumriser with a height, not less than 50 cm.

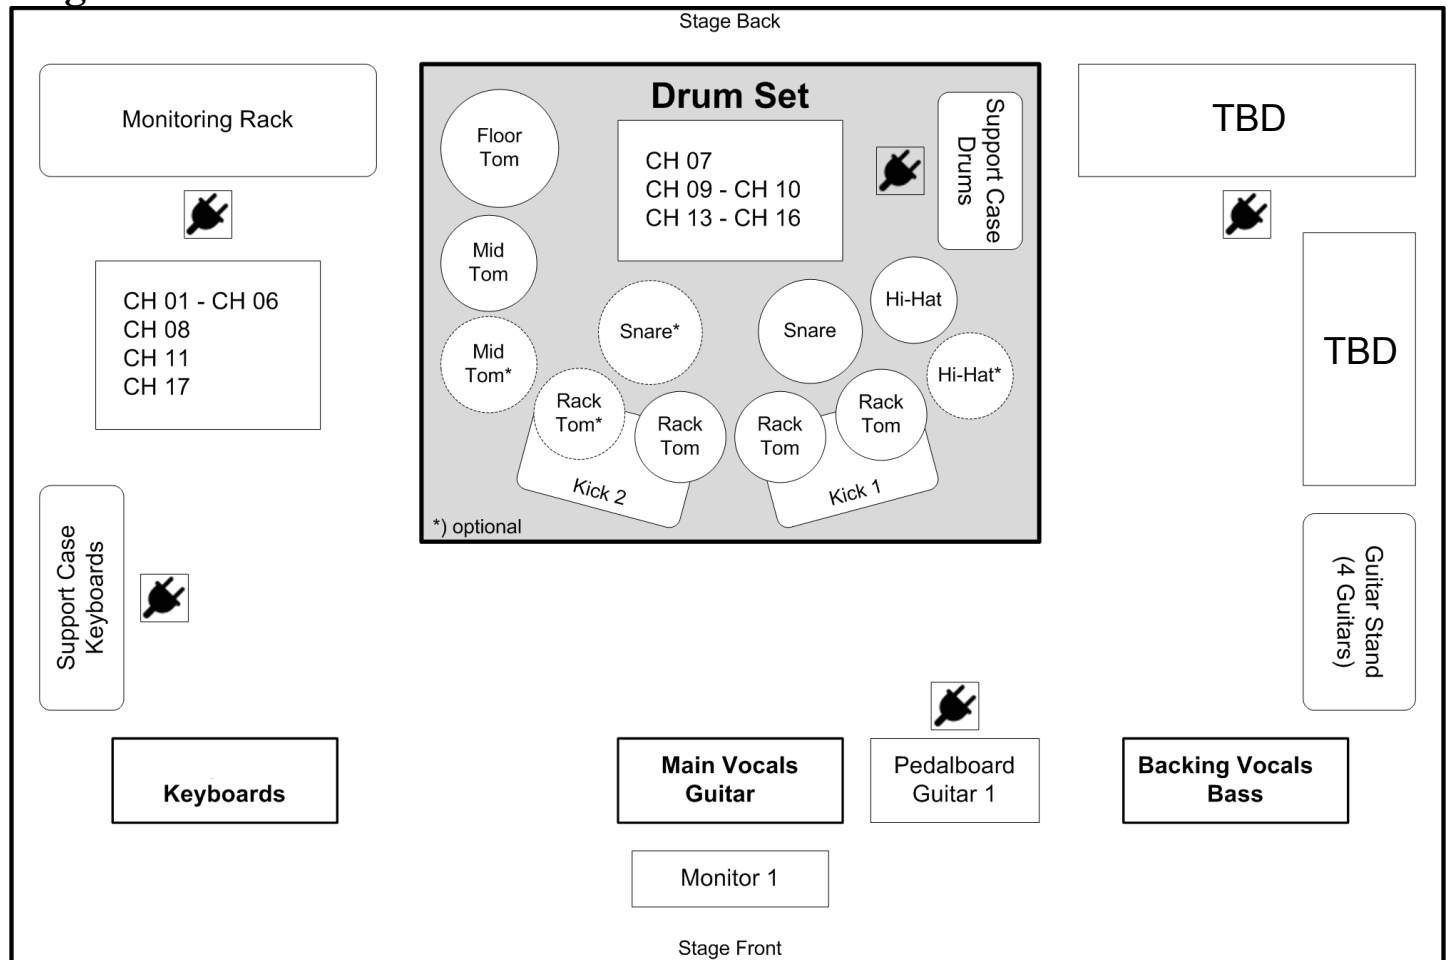

230 VAC power should be available at every position of electronic equipment.

The PA, FOH, lighting system and stage have to be set from the host. The size and power supply must fit the conditions of the venue!

Crew

Mooncry usually works with an own monitoring engineer, but **not** with a FOH sound engineer.
